PROFILE

Senior Product Designer with 6+ years of experience designing and shipping complex B2B SaaS products from discovery to delivery. I specialise in turning ambiguous problems, complex systems, and technical constraints into clear, scalable product experiences.

I work closely with Product, Engineering, QA, and stakeholders to shape problems early, prototype and validate solutions, and support implementation through delivery and post-launch iteration.

Alongside hands-on product design, I lead design reviews, mentor designers, contribute to design systems, and use AI-assisted workflows to accelerate research, exploration, and rapid prototyping.

WORK EXPERIENCE

Lead Product Designer	2024 – Present
Product Designer	Feb 2022 – 2024
SaasJet	
- Lead end-to-end product design across complex B2B SaaS products, from discovery and problem framing through prototyping, validation, delivery, and post-release iteration. - Translate complex workflows, system dependencies, permissions, reporting, analytics, and configuration scenarios into clear and scalable user experiences. - Partner closely with Product Managers, Engineers, QA, and stakeholders to shape problems early, evaluate technical constraints, and define scalable product solutions. - Rapidly prototype and validate product concepts, using feedback and technical constraints to turn ambiguous problems into concrete product directions. - Use product analytics, customer feedback, and behavioural data to identify friction, test hypotheses, and refine product experiences after launch. - Define reusable interaction patterns and contribute to design-system consistency across multiple products. - Run design reviews, mentor designers, and help strengthen design processes across multiple parallel product initiatives. - Use ChatGPT, Claude, Gemini, and Replit to accelerate research synthesis, explore AI-assisted interaction concepts, and build rapid prototypes.	

UI/UX Designer	Dec 2019 – Feb 2022
Freelance	
- Designed UI and UX for B2C and SaaS products. - Built UI components and simple design systems with developers. - Created branding, logos, and marketing pages for early-stage products. - Designed landing pages to clearly communicate product value.	

Jurisconsult Law Teacher	Nov 2009 – May 2016
Previous career in law and education.	

PORTFOLIO ↗

Time in Status Analytics & Reporting Platform for Jira	
Link to product	
Led product design for a complex analytics and reporting platform used by enterprise Jira teams. Designed dashboards, filtering, forecasting, configuration, and workflow visualisation while simplifying dense data, interconnected workflows, and enterprise constraints.	
Replicoo Digital Health Platform	
Link to product	
Designed a digital health product from zero to one, from discovery to MVP, including onboarding, core workflows, dashboards, profiles, and medical-data visualisation.	
Capture in Chrome Browser Task Creator	
Link to product	
Designed a browser-based productivity product end to end, from product concept and user flows to interaction design, UI, and launch.
